~~blood test, radiology, EKG associating step further comprises appending to said information material a fax cover sheet having said barcode printed thereon.~~

41. (currently amended) A transmission paper for medical records said transmission paper comprising:

a barcode, associated with a patient's account, configured to be separately transmitted along with a patient's medical records via a public switched telephone network to a processor, said processor configured to store said patient's medical record in a location relating to said patient's account, associated with said barcode, such that a plurality of health care providers employ a copy of the same transmission paper to transmit various medical records corresponding to said patient said transmission paper further maintaining a coded health care provider identifier, said coded health care provider identifier identifying said health care provider, among a plurality of health care providers, submitting said patient's medical record; and

~~patient access to information which enables a user, authorized by said patient, to access at any time and display said original medical record associated with said patient's account via Internet.~~

42. (original) The transmission paper of claim 41, further comprising payment information of said patient.

43. (cancelled)

Application No. 09/664,969  
Amendment Dated October 31, 2007  
In Reply to Office Action Dated June 14, 2006

44. (currently amended) The transmission paper of claim ~~[[43]]~~ 42, wherein said ~~transmission paper further information comprises an identification number or name, a password~~ and an a patient access code associated with said barcode.

45-46. (cancelled)

47. (currently amended) The transmission paper of claim ~~[[43]]~~ 44, wherein said patient access code information further comprises a password.

48. (cancelled)

49. (currently amended) The transmission paper of claim ~~[[48]]~~ 47, wherein ~~said user identification name or number~~, said password and said access code are covered until said apparatus is used by said patient.

50. (currently amended) The transmission paper of claim 49, wherein ~~said user identification name or number~~, said password and said access code are covered by a scratch-off region.

51-52. (cancelled)

53. (new) The method as claimed in claim 37, wherein said step of receiving said transmission from said account associated with said coded information includes providing said patient an access information for accessing document containing medical information.

54. (new) The method as claimed in claim 37 wherein two or more health care providers, among said plurality of health care providers, each having separate coded health care provider identifiers, may submit said documents containing medical information to be stored in association with said first coded information, and may subsequently review only said documents containing medical information stored in association with said second coded information.

55. (new) The method as claimed in claim 54 wherein said patient may alter access rights to said documents containing medical information stored in association with said first coded information such that a first health care provider having a corresponding first coded health care provider identifier may review documents containing medical information stored in association with said first coded information that are associated with a second health care provider having a corresponding second coded health care provider identifier.

56. (new) The transmission paper as claimed in claim 41 wherein two or more health care providers, among said plurality of health care providers, each having separate coded health care provider identifiers, may submit said transmission paper along with a patient's medical
